# PATIENT APPLICATION

## WELCOME

We specialize in helping our patients achieve a higher level of health through the use of a customized spinal, postural, and/or functional corrective care. Our approach is very unique and different from other physical medicine, traditional physical therapy or chiropractic offices. Our integrated approach allows our patients to achieve far superior results compared to most other systems. Please fill out the following information thoroughly so the doctor can let you know if you are a case we can accept. We do not accept all cases.

Please feel free to ask any questions if you need assistance. We look forward to serving you!

### **ANALYSIS, EXAMINATION AND TREATMENT**

As a part of the analysis, examination and treatment of your condition you are consenting to the following procedures. *Please initial each area below:*

Spinal Adjustment/Manipulative Therapy _____	Cryotherapy (ice) _____
Range of motion testing _____	Physical examination _____
Muscle strength testing _____	Vital signs _____
Radiographic Study/ X-ray _____	Neurological Examination _____
Orthopedic examination _____	Electrical Stimulation, muscle and/or joint _____
Postural Analysis _____	Palpation (examining the body using touch) _____

### **THE NATURE OF THE ADJUSTMENT/MANIPULATION**

One of the primary treatments used by a Doctor of Chiropractic is the spinal adjustment or spinal manipulative therapy. We will use this type of procedure with you. We may use our hands or a mechanical instrument upon your body in such a way as to move your joints. This may cause an audible “pop” or “click” much like one experiences from “popping” knuckles. You may feel a sense of movement.

### **THE MATERIAL RISKS INHERENT IN SPINAL AND/OR JOINT ADJUSTMENT**

As with any healthcare procedure, there are certain complications which may arise with adjustment/manipulation and therapy. These complications include but are not limited to: fracture, disc injury, dislocation, muscle strain, cervical myelopathy, costovertebral strains and separations. Some types of adjustment/manipulation of the neck have been associated with injuries to the arteries of the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and

**Olathe:** 13849 Mur-Len Rd. Ste E Olathe, KS 66062  
Ph: 913.764.7575 Fax: 913.764.5643

soreness following the first few days of treatment. This is similar to the soreness associated with working out and the “lactic acid” response. We will make every reasonable effort during the examination to screen for contradictions to care; however, if you have a condition that would otherwise not come to our attention, it is your responsibility to inform us.

### **THE PROBABILITY OF THOSE RISKS OCCURRING**

Fractures are rare occurrences and generally the result of an underlying weakness of the bone which will be checked for during your history, examination and on x-ray. Stroke has been the subject of tremendous disagreement. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million to one in five million cervical adjustments. The other complications are also described as generally rare.

### **THE AVAILABILITY AND NATURE OF OTHER TREATMENT OPTIONS**

Other treatment options for your condition may include: Self-administered, OTC treatments/medications, Medications and prescription drugs, Hospitalization and Surgical procedures

### **THE RISKS AND DANGERS ATTENDANT TO REMAINING UNTREATED**

Remaining untreated may allow the formation of joint adhesions, and reduced mobility which may lead to a pain reaction and further reduced mobility. Over time this process may complicate treatment making it more difficult and less effective the longer care is postponed.

### **DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE.**

I have read or have had read to me the aforementioned explanation of the adjustment/manipulation and related treatment. I may choose to discuss any questions with the examining provider (MD, physician assistant, chiropractor, or chiropractic intern) and have my questions answered to my satisfaction. By signing below I state that I have weighed the risks involved in undergoing treatment and have decided that is in my best interest to undergo the treatment recommended. Having been informed of the risks, I hereby give my consent for treatment.

## GENERAL PAIN DISABILITY INDEX QUESTIONNAIRE

**Please read:** This rating scales below are designed to measure the degree to which several aspects of your life are present- ly disrupted by chronic pain. In other words, we would like to know how much pain is preventing you from doing what you would normally do, or from doing it as you normally would. Respond to each category by indicating the *overall* impact of pain in your life, not just when the pain is at its worse.

For each of the six categories of daily living listed. PLEASE CIRCLE THE NUMBER WHICH BEST DESCRIBES YOUR TYPICAL LEVEL OF ACTIVITIES. A score of 0 means no disability at all and a score of 10 signifies that all of the activities in which you would normally be involved have been totally disrupted or prevented by your pain.

**1. Family/Home Responsibilities.** This category refers to activities related to the home or family. It includes chores and duties performed around the house (e.g., yard work) and errands or favors for other family members (e.g., driving the children to school)

0	1	2	3	4	5	6	7	8	9	10
Completely able to function					Totally unable to function					

**2. Recreation.** This category includes hobbies, sports, and other similar leisure time activities.

0	1	2	3	4	5	6	7	8	9	10
Completely able to function					Totally unable to function					

**3. Social Activities.** This category refers to activities which involve participation with friends and acquaintances other than family members. It includes parties, theater, concerts, dining out, and other social functions.

0	1	2	3	4	5	6	7	8	9	10
Completely able to function					Totally unable to function					

**4. Occupation.** This category refers to activities that are a part of or directly related to one's job. This includes nonpaying jobs as well, such as that of a homemaker or volunteer worker.

0	1	2	3	4	5	6	7	8	9	10
Completely able to function					Totally unable to function					

**5. Self-Care.** This category includes activities which involve personal maintenance and independent daily living (e.g., taking a shower, driving, getting dressed, etc.)

0	1	2	3	4	5	6	7	8	9	10
Completely able to function					Totally unable to function					

**6. Life-Support Activity.** This category refers to basic life-supporting behaviors such as eating, sleeping, and breathing.
